

KAS, Inc. provides asbestos management services to help clients make logical, cost effective and safe treatment and handling decisions.

Asbestos Management and Consulting

KAS's experienced staff includes Certified Asbestos Inspectors, Abatement Supervisors, Abatement Designers, Management Planners, and Project Monitors who are licensed to operate in both New York and Vermont. KAS provides asbestos consulting, air sampling, bulk sampling, abatement planning, and management services.

Representative asbestos consulting services include:

- Initial consultations
- Inspection to identify asbestos containing materials (ACM)
- Recommended alternative actions and assessment of costs
- Generation of operations and maintenance procedures, personnel awareness training, air testing and reporting
- Project management including competitive solicitation of bids
- Preparation and submittal of NESHAPS and state notifications
- AHERA 3-year school inspections.
